

MURDER MYSTERY 2

A Thrilling Netflix Watch

By: Alex Burich and Avery Hilvert

Murder Mystery 2, the sequel to Murder Mystery has quickly become the Top Watched Movie on Netflix for this week.

Jennifer Aniston and Adam Sandler star in the action, comedy, and mystery movie. The movie takes place three years after the first one, and Audrey and Nick Spitz have started their own detective agency after solving the mystery in the first movie. They get invited to the wedding of their friend Vikram “Maharaja” Govindan, who was also in the first movie. During the ceremony Vik supposedly dies, but it was actually his bodyguard pretending to be him. Nick then sees someone abduct Vik, and he and Audrey start coming up with theories of what happened. Conner Miller, who is a part of a team of professional detectives, comes to the island to lead the investigation. Nick and Audrey end up becoming the main suspects of the crime and they have to escape authorities while also trying to solve the mystery of Vik’s disappearance.

This movie was very different than other murder mystery movies we’ve seen before and there were lots of different plot twists. The storyline was fun and we enjoyed getting to see Audrey and Nick again. However, we thought that this movie was somewhat predictable and not as suspenseful as the first movie. When the murderer was revealed in the first movie, it was more unexpected since the crime had seemingly already been solved. The sequel follows a similar storyline: since one person is said to have committed the crime, but then we learn that it was actually someone else. Since the first movie already surprised us with the same plot twist, it wasn’t as interesting in the second movie. If this movie had a storyline that wasn’t as similar to the first one, it would have been more entertaining. It felt like they were trying to recreate the first movie with a new cast and new location. Audrey and Nick were faced with the same problems as the first movie. They were considered the main suspects by authorities, the outcasts in the group, and they had to solve the mystery while running from the authorities and the other suspects.

The official movie poster for the new Murder Mystery 2 movie. Jennifer Aniston and Adam Sandler, who are two very well known actors are starring in the new film. They partner in lots of movies together which make for good connection and chemistry when working together. This new movie that they star in is an excellent well-made movie.

Overall, Murder Mystery 2 was a good movie but it definitely wasn’t as entertaining as the first one. The plot was very predictable, but if we hadn’t already seen the first one it would have been more surprising. We still would recommend this movie and the first one. We would recommend this movie because the plot of it and the actors that are in it really make it an enjoyable film to watch. Both Murder Mystery and Murder Mystery 2 are very funny and entertaining movies. They are both available to watch on Netflix.
